PREFACE

The statistical data book presents brief information on tourism development in the Republic of Belarus. Published are data on tourist flows, activities of organizations engaged in tourism activities and excursion services, accommodation facilities, development of rural ecotourism in the country.

The statistical data book was prepared on the basis of data from state statistical surveys, administrative and other data.

Data on the number of inbound and outbound tourist trips include individuals crossing the Belarusian-Russian section of the State border, data on the number of domestic tourist trips are provided taking into account the assessment of unorganized domestic tourist flow.

Data on organized tourism for 2021–2024 are presented excluding organizations that provided excursion services.

Data on the number of hotels and similar accommodation facilities are provided excluding accommodation facilities of residents of the "Great Stone" China-Belarus Industrial Park operating on the territory of this industrial park.

The information on rural ecotourism is provided according to the data of the Ministry of Taxes and Duties of the Republic of Belarus.

In some cases, data for 2025 are preliminary and may be revised in further issues.

In certain cases insignificant discrepancy between the total and the sum of its components is explained by data rounding.

The statistical data book is published annually, illustrated with charts and diagrams.

A short glossary of statistical terms and methodologies for calculation of inbound, outbound and domestic tourist flows are available on the official website of Belstat (belstat.gov.by) in the Methodology section (in Russian only).
